Languages: Portuguese (Native) · English (Fluent) · Spanish (Fluent) · German (Intermediate)

PROFESSIONAL PROFILE

AI & automation specialist with 15+ years in multinational environments, working at the intersection of intelligent automation, AI, and business operations. I bring something many automation specialists don't: I understand the business deeply enough to know what to automate and why — not just how. That bridge between technology and business lets me sit with Finance or Operations teams, uncover their bottlenecks, and design, build, and deliver the automated solution end-to-end.

Currently a core member of the Global AI Innovation Hub at KHS (Germany) — part of the Finance organization — I design and orchestrate enterprise automation while helping structure a new innovation function from the ground up — running process discovery, identifying high-impact automation opportunities, and building AI adoption and governance across operations in Brazil, Germany, Chile, Argentina, and Colombia.

My foundation is technical and my lens is business-first: technology is the lever, not the goal. Recognized for stakeholder management and cross-cultural fluency, I align process owners, sponsors, and technical teams around shared objectives. Actively strengthening the business side of my profile through Operational Excellence (Six Sigma) and business-finance training.

CORE COMPETENCIES

Intelligent Process Automation · Robotic Process Automation (RPA) · AI Enablement & Governance · Business Process Analysis · Process Discovery & Mapping (BPMN) · Business Process Transformation · Requirements Gathering · Operational Excellence · Continuous Improvement · Stakeholder Management · Change Management · Business-Technology Bridge · Agile / Scrum · Global Operations

PROFESSIONAL EXPERIENCE

AI & RPA Specialist — Global AI Innovation Hub

Oct 2025 – Present

KHS Group · Germany (Remote) · within the Finance organization, acting as Business Process Analyst

- **Process discovery & value mapping:** Partner with Finance and cross-functional departments to identify automation and improvement opportunities, translating operational bottlenecks into prioritized, value-generating workflows tied to cost and efficiency targets.
- **Transformation function build-out:** Helping structure a newly created innovation function from the ground up — defining process-assessment methodology, automation governance, and intake/prioritization frameworks.
- **Data, KPIs & ROI:** Analyze process and automation data to track KPIs, quantify efficiency gains, and surface financial insights that inform prioritization and ROI — supported by Generative AI tools (e.g. Microsoft Copilot) for data-driven decision-making.
- **AI governance & compliance:** Align initiatives with ISO 27001 and data-protection regulations (GDPR/LGPD), ensuring secure, compliant handling of data across multinational operations.
- **Delivery:** Architect and deploy enterprise automation (UiPath, Power Automate, Python) integrated with SAP S/4HANA — including a flagship initiative projected to save an estimated 5,000+ working hours annually.

Engineering Application Specialist — Global Level

Sep 2023 – Oct 2025

KHS Group · Germany (Remote)

- **Global support & cost optimization:** Owned technical support, deployment, and license cost optimization for engineering platforms (PDM, SolidWorks, VMware, Siemens), ensuring global licensing compliance.
- **Process automation:** Designed and delivered RPA solutions (UiPath) automating repetitive engineering workflows, reducing execution time and human error across multiple processes.

- **International delivery:** Led on-site software training and implementation in Germany (Dortmund & Bad Kreuznach, 2024).

Infrastructure IT Analyst — Latin America Level

Aug 2022 – Aug 2023

Sovos Compliance · Brazil (Hybrid)

- **Regional program delivery:** Managed LATAM-wide infrastructure projects across 5+ countries, applying Agile and PMBOK practices to deliver scalable, business-aligned solutions.
- **Process & governance:** Ran change management and asset lifecycle via CMDB and ITIL-aligned practices; streamlined asset tracking and procurement through automated reporting.
- **Key projects:** Regional data-center rollouts — Argentina, Brazil, Chile (2023); Colombia (2021–2022).

LATAM IT Corporate Specialist

May 2021 – Jul 2022

Sovos Compliance · Brazil (Hybrid)

- **Vendor & budget governance:** Evaluated IT service contracts, managed regional vendor performance, and controlled departmental budgets to optimize resource allocation.
- **IT asset lifecycle (ITAM):** Implemented asset-management processes governing hardware and software from procurement to decommissioning across multiple LATAM offices.

IT Coordinator — Infrastructure & Project Management

Feb 2013 – Oct 2020

Fluor Corporation · Brazil

- **Project delivery:** Planned and executed multiple infrastructure and digitalization projects using Agile and PMI standards, governing scope, timelines, and risk.
- **Global liaison:** Primary point of contact with global departments, aligning local operations with corporate standards, security policies, and global strategy.
- **Budget & asset control:** Directed IT budget planning and optimization while governing ITAM lifecycles and software licensing compliance.
- **International delivery:** Led client-facing infrastructure rollouts, including an international project and data-center refresh in Chile (Santiago, 2017).

EARLIER CAREER

System Analyst — Fluor / engineering systems (2013–15); IT Analyst — Lar's Empreendimentos (2010–11); IT Technician — Ihouse Tecnologia (2009–10); IT Assistant — Constanta Industrial (2007–09). Progressive roles across infrastructure, ERP implementation, database, and engineering-software administration — the technical foundation underpinning my current transformation work.

EDUCATION

Bachelor's Degree in Artificial Intelligence · University Cruzeiro do Sul

2025 – 2027

Bachelor's Degree in Information Systems · Mackenzie Presbyterian University

2008 – 2012

SELECTED CERTIFICATIONS & CONTINUOUS LEARNING

- **Business & Operational Excellence:** Finance for Non-Financial Professionals (UC Irvine – Coursera); Business Process Modeling, Analysis & Improvement (SkillUp); Six Sigma and the Organization (Kennesaw State University).
- **Process & Automation:** UiPath Process Mining Developer; UiPath Automation Developer Associate; Power Automate & M365 Copilot (Advanced); n8n & Zapier process automation.
- **AI & Data:** AI-102 Microsoft Azure AI Solution; Python for Applied AI; Generative AI integration.
- **Enterprise & Governance:** SAP S/4HANA (Finance, Controlling, ABAP fundamentals); ISO 27001 (EXIN); SC-900 Security, Compliance & Identity.
- **Delivery & Communication:** IT Project Management & Cross-Border Business Communication; Agile/Scrum; PMBOK-aligned practices.

TOOLS & PLATFORMS

Automation & AI: UiPath, Microsoft Power Platform, Python, n8n, Zapier, Generative AI (Copilot). · Enterprise: SAP S/4HANA, ERP integrations. · Cloud & Infra: Microsoft Azure, VMware, Microsoft 365. · Collaboration & Data: Jira, Confluence, SQL (querying/analysis). · Methods: Agile/Scrum, PMBOK, ITIL-aligned, ITAM.
